

Sample Energy Policy - KSBA

FACILITIES

05.23

Energy Management

It is the intent of the Board that the District use energy resources in a safe and efficient manner with an on-going focus on identifying and implementing cost saving measures and developing staff and student commitment to identified energy management practices.

To promote this effort, the Superintendent/designee shall direct the development of an energy management plan (EMP) for Board approval and oversee the implementation and maintenance of that plan, which shall address the following components:

1. A District level committee shall be appointed by the Superintendent/designee to develop and implement the energy management plan (EMP).
2. The District level committee shall track and monitor the EMP to determine progress toward managing and reducing energy costs.
3. Effective with the 2011-2012 school year, the Superintendent/designee shall report the EMP results for each fiscal year, including annual District energy usage, costs and anticipated savings to KPPC - the Kentucky Pollution Prevention Center – by October 1st annually through the Kentucky Energy Efficiency Program for Schools (KEEPS).

A status report on implementation of the plan in Board-owned and Board-operated facilities shall be provided to the Board following the end of each fiscal year.
