

KPPC

Kentucky's Resource Center for
Environmental Sustainability

KPPC – Kentucky Pollution Prevention Center

is a state-mandated technical assistance resource center established in 1994. The Center is part of the J.B. Speed School of Engineering at the University of Louisville.

KPPC has the resources, expertise and experienced engineering and support staff to offer highly effective technical assistance that is available exclusively for Kentucky businesses.

Customized technical services at Low or NO cost

Through state funding and federal grants, KPPC engineers are able to provide customized services at **low** or **no cost** to Kentucky businesses, industries and organizations to help them improve their environmental performance and lower their operating costs.

Recognized as a Center of Excellence

KPPC's award-winning programs, on-site assessments and technical assistance have helped more than 780 businesses and organizations throughout the Commonwealth.

KPPC has identified millions of dollars in potential savings for its clients by finding opportunities to lower emissions, save energy and reduce waste.

KPPC Can Help...

Environmental Sustainability Assistance

Sustainability – a competitive advantage

By using a systematic approach to assist industrial, commercial and institutional clients as they develop and implement environmental management solutions, which often include both P2 and E2 technical assistance, KPPC engineers have identified millions of dollars in potential cost savings while helping clients develop long-term behavioral changes within their organizations.

Pollution Prevention – P2

Pollution prevention means:

- reducing or eliminating waste at the source
- promoting the use of non-toxic or less-toxic substances
- re-using or recycling materials rather than putting them into the waste stream.

Reducing waste at the source means lowering costs by increased efficiency in the use of raw materials, energy, water, or other resources and the protection of natural resources by conservation.

Energy Efficiency – E2

Energy efficiency means:

- identifying opportunities, including:
 - utility bill analysis; compressed air and HVAC efficiency
- setting energy performance goals
- planning and implementing energy management practices

KPPC follows the EPA's seven-step Energy Management Process, based on the **Energy Star Program**.

Kentucky E3 Initiative and CHP Program

A new collaborative approach to a sustainable economy

KPPC is the project lead and facilitator for the **Kentucky E3** (Economy, Energy and Environment) initiative. KY E3 is a public/private partnership that supports LEAN manufacturing and economic growth in the Commonwealth.

KPPC is a partner in the **Combined Heat and Power (CHP)** program that promotes high-efficiency technologies in Kentucky's industrial and manufacturing sectors.

Contact KPPC to learn more about these unique opportunities available to Kentucky businesses and industries.

Online Resources and Training

Visit KPPC's website for access to online training, industry news and information about environmental sustainability and cost-saving business strategies. The site includes a **Recycling Services Directory** and a **Consultants Directory** as well as links to many other local, state and national organizations and resources.

“ I consider the study done by KPPC to have been extremely valuable... It is my personal opinion that anyone responsible for maximizing the efficiency of power consumption in an organization would be wise to use KPPC's services.

John Austin
Vice President and Subsidiary Manager
Owensboro-based Modern Welding

Our hard work to establish self-sustaining energy-saving programs has helped increase our competitiveness... Our partnership with KPPC has been instrumental in the development of our energy management planning, reporting and sustainability. Our goal will be to continue to improve overall efficiency at TOPY.”

Terry Kurihara
President, TOPY America
Frankfort Kentucky

We're Here to Help Your Business

The first step is to contact us

We can discuss any questions you have, your goals and unique business needs and work with you to develop a customized level of assistance at little or NO cost to you.

Any assistance KPPC provides to its clients is **non-regulatory** and **confidential**.

Call or e-mail us to get started.
